## Product Features:

Angled USB 3.0 cable assemblies are perfect for high speed data transfer in tight spaces. The durable, molded angled ends save space and stress on the connector heads, strain reliefs and connecting ports. They also create neat and organized cable runs. Multiple 90° and 45° connector options are available in up, down, left and right in both USB 2.0 and USB 3.0 standards. Since Type C connectors have no orientation, they are fit for left and right or up and down simultaneously. All cables are built with UL recognized jackets and use gold plated contacts for a robust and reliable connection. See L-com.com's industry leading selection of angled USB cables today.

Angled 90° Type C Male is fit for up or down orientation to Straight Type A Male 30 micro inch gold plated contacts provide reliable connections with repeated mating cycles

USB revision 3.0 compliant

Molded back shells provide durability and increased strength at cable entry point for solving difficult connection problems in tight spaces

UL Style 2725 PVC jacket with 26AWG power conductors for excellent power transfer capability

Application

Data Storage and Acquisition

Test and Measurement

Video Transfer or Cameras

Portable Data Storage

Gaming hardware and interfaces
